HIGH CONDUCTIVE

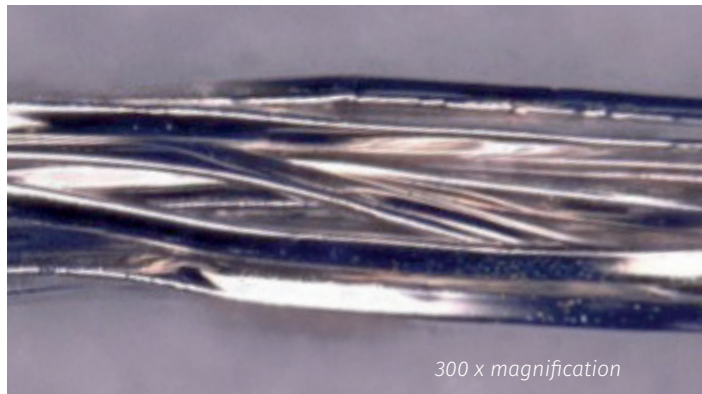

Highly conductive and versatile embroidery thread for Smart Textile applications

MADEIRA

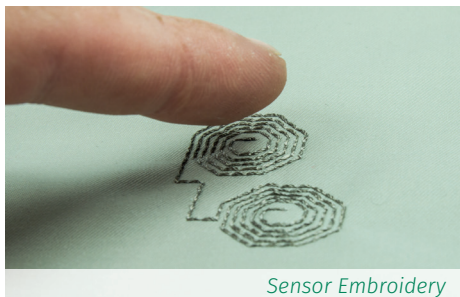

Smart Textiles are intelligent textiles which bring technology and textiles together and where functionality is directly integrated into the garment structure.

Embroidery and sewing are great methods to incorporate sophisticated functionalities into fabrics to achieve desired performance. For this purpose MADEIRA offers a highly conductive thread (HC).

High wear resistance and excellent stability is provided thanks to a specific manufacturing process, where pure silver is twisted into the polyamide core of the thread. Silver plating of each fibre guarantees optimum conductivity which is required especially at contact points. MADEIRA's highly conductive embroidery thread does not only offer specific technical functionality but also retains its textile characteristics such as flexibility, resilience and easy processing.

Example:

HC40 and **HC12** are skin friendly, comfortable, biocompatible, washable and therefore ideal for Smart Textile applications. Amongst all metals, silver offers the highest electrical and thermal conductivity. In addition, it has antibacterial and antistatic properties.

Applications include:

- Lighting / LEDs
- Textile based sensors and actuators
- Heating
- Flexible circuit paths

Application Sectors include:

- PSA, performance and leisure wear, home textiles
- Fashion innovation
- Medical and laboratory technology
- Work and functional wear
- Automotive and aerospace
- Telecommunication

Application possibilities and areas are limitless. MADEIRA recommends to test the thread and designs first in order to ensure technical and functional requirements are met.

HC 12

100% Polyamide / fully silver plated*
dtex 235x2

Resistance: < 100 Ω /m

100/#16

1 x 1000 m
Art. No. 420 0000

SAMPLE: 1 x 150 m
Art. No. 420 SMP

HC 40

100% Polyamide / fully silver plated*
dtex 117x2

Resistance: < 300 Ω /m

75/#11 - 80/#12

1 x 2500 m
Art. No. 410 0000

SAMPLE: 1 x 250 m
Art. No. 410 SMP

*Silver plated with min. 99% pure silver /
Shieldex® Thread from Statex
